Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-14, drawn to a system having a fluid source, a plurality of nozzles, a conveyor belt, a plurality of sensors and a processor, classified in Class 134, subclass 123.

Group II: Claims 15-20, drawn to a method for sanitizing a shopping cart by ejecting fluid on the surface; conveying the carts and drying the shopping carts, classified in Class 134, subclass 32.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.P.E.P. § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as having heater or drying air or the apparatus as claimed can be used to practice another and materially different process such as conveying parts from one place to another on a conveyor.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

No Phone number is provided for Ms. Rhonda Holbrook to make a phone call. Therefore, a written restriction is been mailed.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
